

## 1987 Q17

17. Abby, Bret, Carl, and Dana are seated in a row on four seats numbered #1 to #4. Joe looks at them and says:

"Bret is next to Carl."

"Abby is between Bret and Carl."

However each one of Joe's statements is false. Bret is actually sitting in seat #3. Who is sitting in seat #2?

- A) Abby    B) Bret    C) Carl    D) Dana  
E) There is not enough information to be sure.

17. D    Since Bret is in seat #3 and statement (1) is false, Carl must be in seat #1. Then, since statement (2) is false, Abby must be in seat #4 leaving Dana in seat #2.
